Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

DETAILED ACTION

Note: This Action corrects inadvertent omission of the last amendment to the claims (5/1/06) as far as the claim language as considered within the Office Action. The references used in the rejection under 35 USC 103a of independent claims 1,8 and 9 remain the same as the original mailing (1/26/07). However, allowable subject matter has been considered based on the last amendment for independent claims 2,10, 11 and 18.

Response to Arguments

1. Applicant's arguments with respect to claims 1,8 and 9 have been considered but are moot in view of the new ground(s) of rejection.

Claim Rejections - 35 USC § 103

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. Claim 1,8 and 9 are rejected under 35 U.S.C. 103(a) as being unpatentable over Hind et al. (Hind), U.S. Patent No. 2004/0203908, in view of Jackson et al. (Jackson), US Patent No. 6,061,025.

Art Unit: 2617

Regarding claims 1,8 and 9 Hind discloses a radio apparatus characterized in that: a plurality of virtual terminal apparatuses are assumed which are different from a terminal apparatus which is a targeted communication party; an antenna's directional pattern is formed such that signal strength in the direction of one of the plurality of virtual terminal apparatuses is relatively small (pages 2-4 [0028-0047] and see Fig. 5).

Hind fails to explicitly disclose wherein a signal is transmitted to the terminal apparatus which is a targeted communication party such that the directional pattern is varied so as to prevent each of the plurality of virtual terminal apparatuses at predetermined intervals.

In a similar field of endeavor, Jackson discloses changing the direction in which the virtual terminal apparatus exists (see col. 8, lines 37 to col. 9, line 50 and see Figs. 1-3).

At the time of the invention it would have been obvious to one of ordinary skill in the art to modify Hind to include a tunable microstrip antenna for antenna selectivity.

Allowable Subject Matter

4. Claims 2-7,10,11-24 are allowed.

Conclusion

5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Joy K. Contee whose telephone number is
